**DETAILED ACTION**

***Response to Amendment***

1. This action is in response to the amendment mailed January 20, 2004.

Claims 1-8 are pending.

***New Matter - 35 U.S.C. 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-8 rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 1 and 4, the phrases, "the composition of the conventional surface coat does not contain silica" and "at least one conventional surface coat...the composition of which not containing silica" are not supported by the specification.

Any claim containing a negative limitation which does not have basis in the original disclosure should be rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. M.P.E.P. 2173.05(i). Applicant is required to cancel the new matter in the reply to this Office Action.

***Response to Arguments***

4. Rejection made under 35 U.S.C. 103(a) as being unpatentable over Kitamura et al. (U.S. 6,465,086) is withdrawn due to the conventional surface coat of the reference containing silica and the inner coat not teaching precipitated calcium carbonate.
